

Anexo I das Normas IFRA - 48º Aditamento

Annex I to the IFRA Standards - 48th Amendment

This Annex give indicative maximum levels of the limited substances in different fragrance materials (e.g. in essential oils). These indicative levels should be taken into account when determining the compliance of a fragrance compound under its conditions of use. However, if reliable analysis has shown that the level of the limited substance in a specific fragrance material is not the same as the indicative level given in this Annex, then the analyzed level can be used instead of the indicative level.

The list is intended to be as comprehensive as possible but still remains illustrative only and cannot be regarded as exhaustive.

Part I

Part I is an alphabetical list of the materials that have a standard and for which contributions from other sources need to be taken into account, listing the sources with indicative values.

CONSTITUENTS			NATURAL RAW MATERIALS
